

Simple ways to save money on your utility bills!

Around 12% of your energy bill is spent on heating water – shorter showers not only save water but energy too.

Doing a 30 degree wash can help save 57% in energy, ensure that you are filling your washing machine to cut down on water and energy usage.

Using a bowl or plug when washing the dishes could save up to 50% water.

When waiting for the tap to run warm, collect the water in a jug or bowl and use this for the kettle or watering plants.

Use a water butt to collect rainwater and use it to water plants or wash the car.

Need support with your bill?
